

Overlay Tiles are ideal for use as garden paving on patios, walkways, display areas as outdoor tiles and as anti slip tiles and many other applications. The only limit is your imagination.

They can be used to cover and enhance almost any surface they such as steps, concrete bases and paving slabs. It is also common for extra to be ordered to loose lay in gravel for decorative purposes or as a base for plant pots etc. The tiles are made from glass fibre reinforced concrete and when used with our PU Adhesive they have ample strength for pedestrian use as well as being frost resistant. At only 2kg per tile they are very light weight and easy to handle.

Cutting is easily achieved using a diamond tipped blade on a small to medium grinder.

The tiles are available in a variety of finishes such as Checkerplate, Striated, Riven and Imperial, and in a very large range of colours. Please see our colour chart for all the tile finishes and colours available.

The tiles are laid using our PU adhesive, which is supplied in 1 litre bottles and is very simple to use with instructions both online and on the bottle.

Suitable For Use On:

**Patios - Steps - Walkways - Display Areas
Concrete Bases - Paving Slabs**

Checkerplate Range

Width = 297mm Length = 297mm Depth = 12mm
2kg Per Tile

Terra Marbled

Striated Range

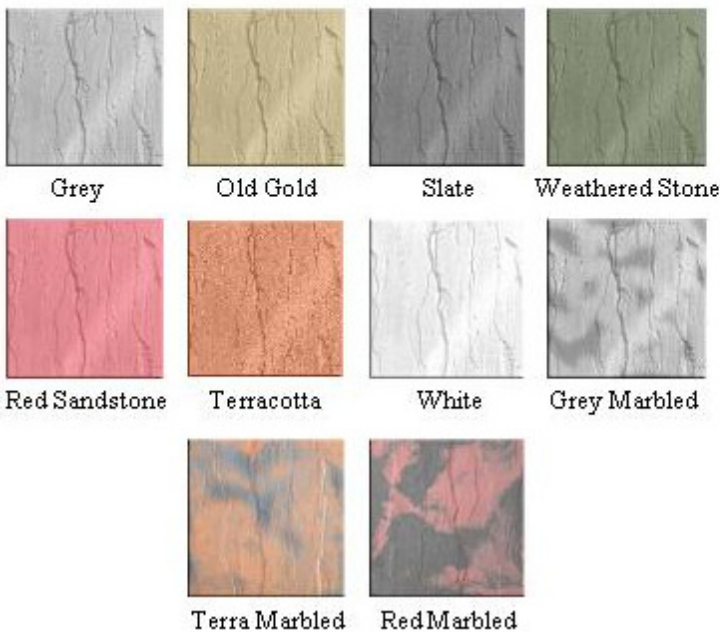

Width = 297mm Length = 297mm Depth = 12mm
2kg Per Tile

Red Marbled

Riven Range

Width = 294mm Length = 294mm Depth = 14mm 2.2kg Per Tile

Imperial Range

Width = 297mm Length = 297mm Depth = 12mm 2kg Per Tile

PU Adhesive

The Overlay Tiles PU Adhesive has been specially formulated to retain an element of flex when cured to allow the tiles to expand and contract during temperature changes. The method for applying the adhesive allows excess rain water to drain under and between the tiles.

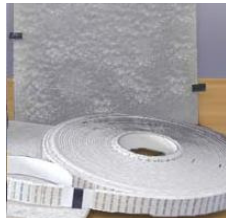

As Overlay Tiles are Glass Fibre Reinforced they are frost resistant, very strong and have high slip resistance. Full Instruction for use are available online and on each bottle of adhesive.

Accessories

Sealant

Sealant can be applied after the tiles have been laid. Helps to prevent staining from liquids, food, bird droppings etc.

Soft Shims

Available in rolls of 100. Used to adjust the height of the tile on surfaces with undulations of up to 6mm.

Slab Lifters

Sold in pairs they are ideal for lifting concrete slabs to adjust undulations prior to overlaying our with tiles

2mm Spacers

Our 2mm long leg spacers are ideal for creating the correct gap between tiles. Sold in 250 & 500 bags.

Cleaner

Specially formulated for use with our tiles our cleaner can remove dirt and grime without damaging the tiles

Overlay tiles, adhesive and accessories can be ordered from all good building merchants across the UK. Please contact us for more information on your local merchant if you are unsure. Full terms and conditions and guides to laying our tiles on several surfaces can be found on our website.
